

Dürr Group increases its production and IT capacities in India

Bietigheim-Bissingen, Darmstadt, March 14, 2023 — Schenck RoTec, a German mechanical engineering company within the Dürr Group, has extended its business location in Noida near Delhi, India. The new building complex hosts a production area to expand Schenck's balancing business, as well as offices to strengthen the global IT capacity of the Dürr Group. The investment volume amounts to €5.5 million.

In his address at the opening ceremony with around 350 guests and employees, Dietmar Heinrich, CFO of Dürr AG, emphasized: "We see tremendous growth potential in India. In the years to come, India will play an even more important role for the Dürr Group than is already the case today."

Schenck RoTec can look back on a long history in India. The company has been developing and manufacturing balancing machines at this location for the local market since 1986. Since 2020, Schenck India also operates as a center of competence for tire and wheel assembly machines to additionally serve the global market. An IT area including a software development center is also based at this site. To date, around 225 employees have been working on 12,500 m² (134,548 ft²) in Noida. The extension now makes it possible to hire additional IT specialists and increase the production capacity of the Tire & Wheel business.

The new building complex is just 200 meters (656 feet) away from the existing site. 3,900 m² (41,979 ft²) of the total surface of approximately 5,600 m² (60,277 ft²) are dedicated to Tire & Wheel manufacturing. "Schenck India with its experienced, highly motivated employees, is a key pillar of our international business. I'm convinced that the new production hall is a major milestone on our path toward further global growth", stresses Jörg Brunke, CEO of the Measuring and Process Systems Division of the Dürr Group, of which Schenck RoTec is part.

The remaining approximately 1,700 m² (18,298 ft²) of the new building provide space for the IT area and the software development center with around 80 employees. The department is expected to grow to a total of 100 employees by the end of this year. The modern premises are designed for cooperative and creative collaboration. The development of IT competence is part of the digitalization strategy of the Dürr Group.

but not limited to those described in disclosures of Dürr AG, in particular in the chapter “Risks” in the annual report of Dürr AG. Should one or more of these risks, uncertainties and other factors materialize, or should underlying expectations not occur or assumptions prove incorrect, actual results, performances or achievements of the Dürr Group may vary materially from those described in the relevant forward-looking statements. These statements may be identified by words such as “expect,” “want,” “anticipate,” “intend,” “plan,” “believe,” “seek,” “estimate,” “will,” “project” or words of similar meaning. Dürr AG neither intends, nor assumes any obligation, to update or revise its forward-looking statements regularly in light of developments which differ from those anticipated. Stated competitive positions are based on management estimates supported by information provided by specialized external agencies.

Our financial reports, presentations, press releases and ad-hoc releases may include alternative financial metrics. These metrics are not defined in the IFRS (International Financial Reporting Standards). Net assets, financial position and results of operations of the Dürr group should not be assessed solely on the basis of these alternative financial metrics. Under no circumstances do they replace the performance indicators presented in the consolidated financial statements and calculated in accordance with the IFRS. The calculation of alternative financial metrics may vary from company to company despite the use of the same terminology. Further information regarding the alternative financial metrics used at Dürr AG can be found in our [financial glossary](#) on the web page.
